DETAILED ACTION

Response to Arguments

1. Applicant's amendment has overcome the examiners previously presented rejections. However after further consideration and discussions, the examiner does not believe the claims are allowable over the cited references. Therefore, these rejections have been withdrawn, although they do not necessarily overcome the Lippisch reference altogether. Upon further consideration an election/restriction has been presented.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 3-5 and 21-24, drawn to a vortex generator, classified in class 244, subclass 199.
 - II. Claims 12-14, 19, 20 and 25-27, drawn to a method for accelerating diffusion of a primary tip vortex, classified in class 244, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and

materially different process, such as generating a primary tip vortex or generating a small-scale vortices.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Upon election of one of groups I and II, applicant is further required under 35 U.S.C. 121 to elect one of the following disclosed and claimed species:

- a. Blades,
- b. Propellers
- c. Turbines
- d. Wings
- e. Fins
- f. Sails

6. Upon election of one of groups I and II, applicant is further required under 35 U.S.C. 121 to elect a single disclosed species

- g. Pins
- h. Plows
- i. Ramps
- j. Vanes

Art Unit: 3644

7. Upon election of one of groups I and II, applicant is required under 35 U.S.C. 121 to elect a single disclosed species

k. Deployable

l. Non-deployable protuberances

8. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
